

Electric motors

H17RL Series

Low voltage compact frame big power electric motors

Powerful, efficient and flexible...

Technical catalogue

Technical characteristics for H17RL series

Basic form of electric motor

Protection class	IP55
Cooling method	cast iron
Frame number range	H315 - 560
Efficiency	IE3, IE4
Power range	132 - 2500 KW
Insulation class	F class
Working system	S1
Ambient temperature	-20 - +40°C
Installation form	B3, B35, V1
Direction of rotation	400/690 V, 690/1200 V, (or 380/660, 660/1120 V)
Frequency	50 Hz (60 Hz can be derived or specified frequency)

- In indoor places without dust, IP23 motors can be used to reduce the size of the motor and reduce the procurement cost;
- Specific winding design can support multiple voltages (50 Hz or 60 Hz);

The use environment of the motor

- The altitude does not exceed 1000 m (the environment for use at the specified altitude can be derived);
- Ambient air humidity: the monthly average maximum relative humidity is 90%, and the average temperature is not higher than 25 °C;
- Environmental place: no flammable gas, no dust place, "W" type can be derived for outdoor environment, "TH" type for humid tropical environment, "WTH" type for outdoor humid tropical environment, "WF1" type for outdoor moderate corrosion protection, etc.

Power supply for the motor

- Allowable voltage fluctuation +5 %, frequency fluctuation $\pm 2\%$, combined voltage and frequency fluctuation +5 %;

The structure of the motor

- The base and end cover of the motor are made of resin sand, which is beautiful and elegant;
- The motor is equipped with a non-stop oil injection and discharge device;
- The motor can be equipped with bearing with bearing temperature measurement PT100; winding temperature measurement PT100, PTC, moisture-proof heater and other accessories.

Quality management and certificates

VYBO Electric is a modern High-tech energy saving company that pays high attention to quality, environment, safety and precision and efficiency of work and energy in production. Therefore, it holds a lot of certificates and quality control systems. **Our priority is quality control.**

Basic certificates include:

ISO9001

The primary task of the ISO 9001 standard is to focus on system management and quality management in the organization. The satisfaction of the customer and the fulfillment of his requirements, which are specified in contracts, orders, or technical drawings, are in the first place. The quality management system is linked to all processes in the company. The standard focuses on the management of human and financial resources, on the stability of infrastructure, including buildings, transport, hardware, software and other communication or information technologies. An important part is also the planning of production and services, the management of the purchasing process, but also the management of non-conforming products.

ISO14001

The main priority of the ISO 14001 standard is to identify and understand the environmental aspects and activities that are related to the entire infrastructure of the company and, based on this, to regulate the environmental impact on the environment.

In its scope, the ISO 14001 standard creates the conditions for determining environmental goals and plans, the fulfillment of which is examined at regular intervals by top management and also by an independent body during internal audits.

This standard is intended for all organizations and companies that consider environmental protection as their primary goal.

The benefit of the standard for society is mainly:

- control over the environmental impact on the environment
- control over produced emissions and waste
- saving material and energy
- prevention of accidents
- compliance of the company's activities with legal requirements
- zero fines for environmental behavior
- creation of a good reputation and prestige of the company

The ISO 45001

Specification (formerly known as OHSAS 18001) is an internationally recognized standard that declares compliance with the principles of a safe enterprise, managing risks at work and protecting the health of workers during work. It does not only concern danger and accidents, but also emphasizes other aspects such as the good condition and mental well-being of the employee.

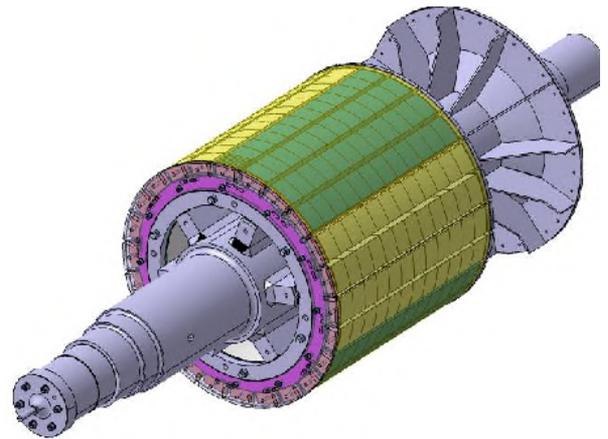

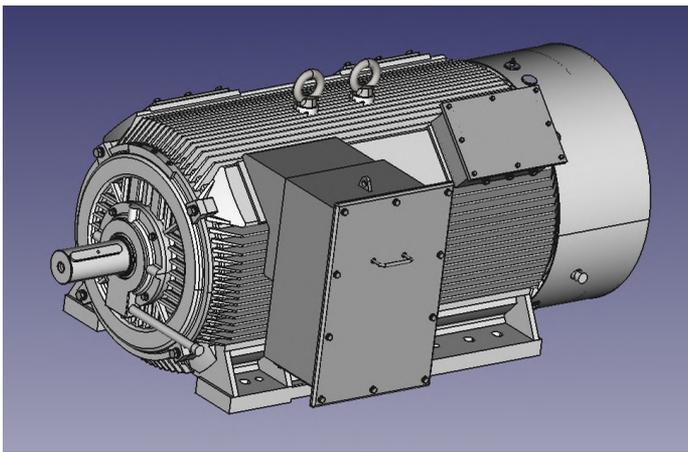

The certificate is held in Slovakia as STN ISO 45001:2019 and is under the title Management systems of safety and health protection at work. Requirements with guidance for use. It replaces the STN OHSAS 18001 standard.

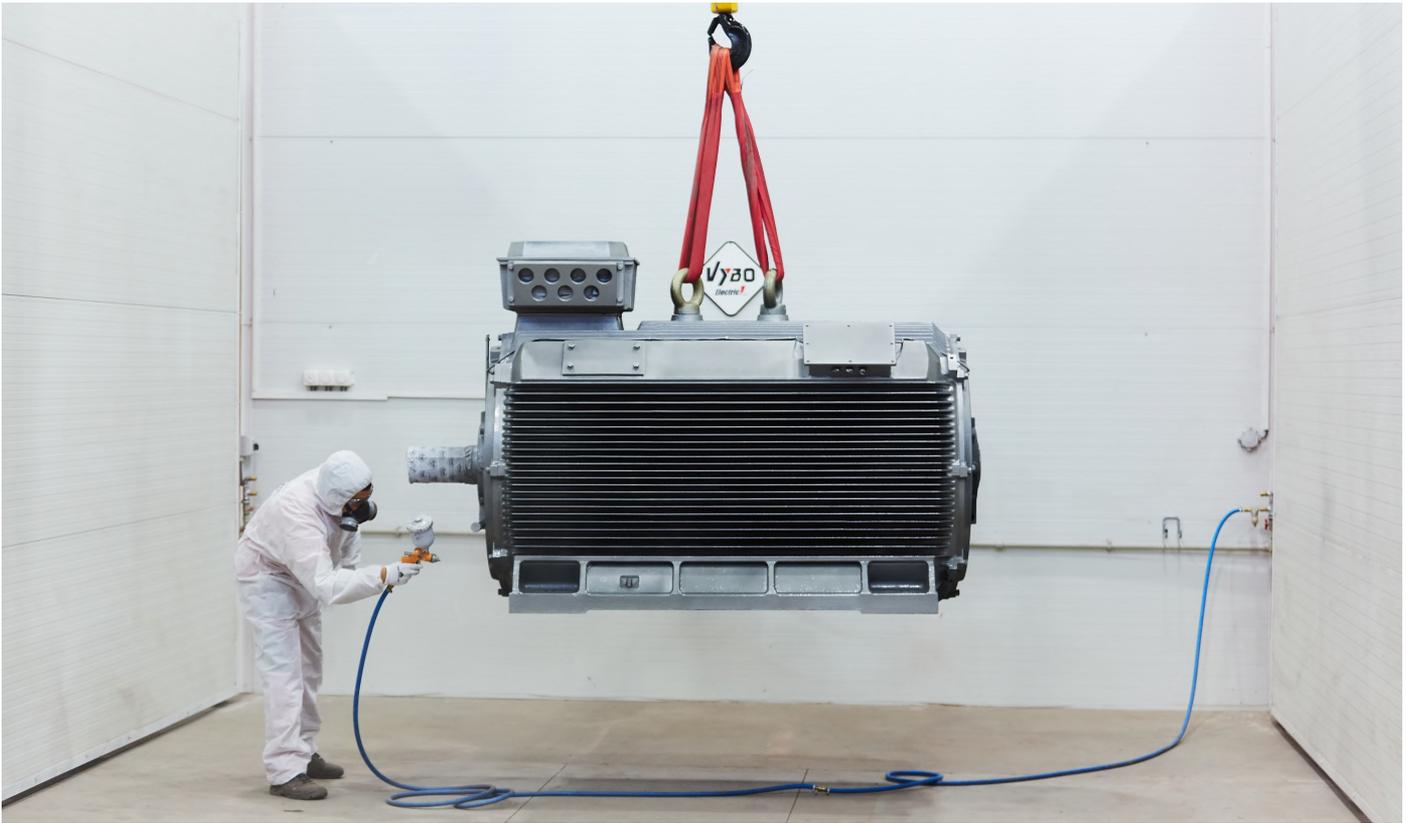

ISO50001

Energy management systems Energy efficiency help organizations save money, save energy resources and also help to prevent climate change. ISO 50001 encourages organizations in all sectors to use energy more efficiently through the development of an energy management system. The international standard ISO 50001: 2011 specifies the requirements for building, maintaining and improving the energy system. It aims to enable organizations to implement a systematic approach that will help achieve lasting improvements in energy efficiency, energy use and consumption.
